ASSEMBLY SERVICES

TOOLING & ACCESSORIES

Whether you use copper or fiber, WSE has connectors, panels and assemblies to meet your connectivity needs.

White Sands Engineering, a division of WESCO Distribution, Inc., is the largest manufacturer of custom cable assemblies in the United States.

Our ability to design and manufacture custom connectors, panels, tools and assemblies makes WSE a leader in the connectivity industry and the answer to your cabling and connectivity needs.

From prototype design to full production runs, our engineers can work with your specifications to develop the innovative assembly you need, no matter how complex. And with our ISO certified production lines and exact testing and requirements, we guarantee the highest-quality standards.

PRODUCT HIGHLIGHTS

- Connectors for Headend, Broadcast & AV
- Mini-Cable for Headend, Broadcast & AV
- DOCSIS 3.1 Compliant Quad-Shield Mini Headend Cable and Connectors
- Custom Cable Assembly Services
 - ◆ Jumper Cables
 - ◆ Kits
 - ◆ Racks
 - ◆ Panels
- CISCO Products & Accessories
- ARRIS Products & Accessories
- Custom Manufacturing & Engineering
- Tools & Accessories
- Custom Kitting Capabilities
- Proprietary SKUs & Staging Solutions
- Rack & Stack

WSE manufactures custom cable assemblies for the broadband, satellite, broadcast, telco and computer industries. We are a proven market leader in kitting capabilities encompassing a wide range of products including self-install kits.

Our specialized line of 75 Ohm, mini RG59 coax connectors feature a labor-saving one piece design and associated 23 AWG precision video cables. We also supply the tools and accessories to facilitate field installations.

CUSTOM OR IN STOCK

While we stock many frequently used cable and connector products, if it's not in stock we will work with you to design and manufacture products for your specific application. We can manufacture over 500,000 assemblies per month in our 54,000 square foot facility.

WSE's knowledgeable staff will make recommendations with regard to design, source, material, and packaging of any assembly or kit needs you may have.

Our commitment to quality manufacturing coupled with our high volume and quick turn production capability gives us an advantage in delivering custom solutions.

INDUSTRIES SERVED

WESCO ASSEMBLY

Harness the Power of OneWESCO

With White Sands Engineering, PanelCrafters, and FiberTron all in the same facility, WESCO Assembly provides value engineered solutions for all parts of your operation including fiber and copper assemblies, connectors, wall plates, panels and cable jumpers. Our products and manufacturing expertise offers you the easy convenience of having one supplier for both standard and custom orders. Our process has proven to be one of the best in the industry, giving our customers exactly what they need - when they need it.

Your project begins with a review of your concept drawings or idea by our engineers. From there, we'll work with you to create the most affordable and effective solution. Our in-house dimensional and graphic design professionals will work to bring your ideas to life on screen and provide you with detailed designs and specifications for your new product.

We also provide professional technical support at every level of the project along with numerous expedited service options. And with the global reach of WESCO, we can help structure shipping and logistics for both short-term requirements and long-term deployment strategies.
